Soni, the then Deputy Director General, ICAR, New Delhi vide letter No. 1-80/91 IA-I dated 23rd October 1992 at the Southern Regional Station (SRS) campus of ‘National Dairy Research Institute’(NDRI), Bangalore by transferring the Animal Nutrition and Animal Physiology sections of Southern Regional Station of NDRI with men and material to initiate functioning of the Institute with a specific mission and mandate. About 50 acres of farm land of SRS, NDRI was transferred for setting up of the new Institute. Infrastructure was developed on this land and the Institute was shifted in August, 2003 to the newly constructed building from the temporary premises within a period of 7 years. Considering the objectives of establishing this new Institute, the research programs were reoriented more towards fundamental research areas of importance in animal nutrition and physiology. During the course of time, the Institute has made significant research achievement, in the niche areas of animal nutrition, animal physiology, biotechnology and molecular biology and has been recognized as one of the centre of excellence in these areas.</p> <p><u>Formation of the department and the HoDs</u></p> <p>After getting approved in XIthPlan EFC for formation of three divisions with HOD, the Council’s approval has been received vide order NO. 1. Rajya Sabha Question Dy. No. U1842 (replied on 26.7.2024)

SI No	Query	Response
(a)	Details of roadmap prepared by ICAR to harness science and innovation for securing food and nutritional security to the nation	<ul style="list-style-type: none"> • Improving milk, meat and egg production through nutritional and physiological interventions. • Sexing of semen and embryos for desired sex as and when required for milk or meat production. • Development of designer animal products for human consumption. • Modeling and forecasting livestock and fish resources: Requirement and availability in India. • Generation of data base on “assessment and forecasting of feed resources at regional and national level for different production scenarios”.
(b)	Details of focused areas identified by ICAR	<ul style="list-style-type: none"> • Developing plant-based nutraceuticals as alternatives to antibiotics • Assessment forecasting of feed resources at regional and National level • Biosynthesis of Nano mineral particles for livestock production • Developing chelated trace minerals for animal production and reproduction • Developing protocol for improved cryopreservation of cattle, buffalo and small ruminants semen • Stem cell research • Research for improving poultry production • Life cycle assessment of animal production under different feeding systems • Developing climate resilient livestock production system • Production of designer feed supplements

			<ul style="list-style-type: none"> • Indigenous production of LH and FSH hormone for buffalo • Developing buffalo bull fertility diagnostic chip • Developing synthetic semen extender for indigenous cattle • Translation and adoption of nutritional and physiological technologies for improving fertility and production in lactating animals 	
	(c)	<p>Details of technologies demonstrated and disseminated by Central and State agencies, KVKs during the last three years, year-wise and the extent of above which have assisted farmers in pushing their productivity and generating more income</p>	<p>2021-22</p> <ul style="list-style-type: none"> • Hydroponic fodder production • Technologies of silage production in plastic drums. • Areca sheath as an alternate dry fodder for livestock <p>2022-2023</p> <ul style="list-style-type: none"> • Ration balancing by using the NIANP feed charts • Pineapple fruit residue silage as fodder source for livestock • Azolla production <p>2023-2024</p> <ul style="list-style-type: none"> • Ration balancing using locally available feed ingredients. • Green fodder production and their cultivation. • Fertimin plus – a feed supplement 	

		(a)	Whether the Government is taking any measures to address the shortage of green fodder in India, particularly in light of the significant growth in the dairy industry over the past few years?	Yes.	
		(b)	If yes, provide details; if not, reasons thereof	<p>Efforts have been made by this institute for fodder development and alternate feed resources for dry fodders and green fodders for livestock</p> <ul style="list-style-type: none"> ➤ Evaluation of grain sprouts as fodder for livestock ➤ Micronutrient (zinc)-enriched fodder (maize and jowar): Soil fortification with zinc resulted in increased zinc content in fodders as well as higher biomass yield. ➤ Utility of drought tolerant crops like perennial jowar and multi-cut bajra demonstrated in several agro-climatic zones (Karnataka, AP, Odisha & TN) for enhancing fodder cultivation for livestock feeding. ➤ Distributed fodder seeds of high biomass production (variety: CoFS-31). ➤ Effective utilization of fruit residues like pineapple and jack demonstrated and propagated in Karnataka. ➤ Popularization of fodder trees like Sesbania, and Melia in Karnataka and Odisha ➤ Areca sheath as an alternate dry fodder for lactating animals <p>Apart from fodder cultivation, livestock farmers are encouraged to conserve their surplus green fodder by making silage for lean period feeding. Farmers were trained on ‘Azolla production, grain sprouts, hydroponic fodder and silage preparation’</p>	

			The Institute regularly organized training programme on “Fodder management in dairy animals” for livestock farmers.
		(c)	<p>Whether the ministry has taken any steps to mitigate the impact of climate change on livestock feed production, considering its implications for both animal health and the dairy industry and</p> <p>Yes. ICAR/Government is aware about the various components which contribute to the greenhouse gas emissions from the dairy sector which cause climate warming and thus interventions have been taken up to mitigate this enteric methane emission from animals.</p>
		(d)	<p>If yes, provide details; if not, reasons thereof?</p> <p>The Government of India through Indian Council of Agricultural Research (ICAR) has funded a project on ‘Estimation of Methane Emissions under Different Feeding Systems and Development of Mitigation Strategies’ since 2007 and the project is implemented at the various centres (Karnataka, Tamil Nadu, Gujarat, Rajasthan, Punjab, Maharashtra, Uttar Pradesh, and Haryana) in the country. One of the major aims of the project was to assess the state and species wise emission of enteric methane from Indian livestock. This recent estimate revealed that Indian livestock annually emit about 9.25 Tg (Teragram) of enteric methane.</p> <p>Indian Council of Agricultural Research (ICAR) has developed various phyto-based anti-methanogenic products and technologies, which were tested in small and large ruminants at the organized farm as well as in field conditions. Harit Dhara, Tamarin Plus, Tropical tree leaves (Neem, Banyan, Jamun, Jackfruit, Som), AviBattika and seaweeds are some of the phyto-based products/technologies developed by the ICAR. The inclusion of these phyto-based anti-methanogenic products/technologies in the diet of cattle, buffalo and sheep led</p>

to a reduction of 17-20% in daily enteric methane emission. Ministry of Fisheries, Animal Husbandry and Dairying issued advisory to the State Animal Husbandry Secretary to adopt the use of Harit Dhara and Tamarin Plus for the inclusion in diet and few of the above phyto-based anti-methanogenic products have already been licensed for the commercial production by various companies. These green feed supplements will help to mitigate the adverse impact of future climate warming.

4. Provisionally admitted question for the Rajya Sabha diary no. U938 (Replied on 31.7.2024)

Sl. No.	Question	Reply
(i)	What steps has the central government taken to establish a high-power committee made up of distinguished Agricultural Technocrats to enhance/revamp the research efforts of ICAR?	ICAR HQ concerned. However, at the institute level, scientist-Industry-Farmer interactions meets are being conducted especially to showcase the technologies developed by the institute.
(ii)	Did ICAR officially ask for written feedback from State Governments about the difficulties experienced by their farming communities?	Yes. On interactions with Director, Animal Husbandry, Department of Karnataka State and also time to time interactions with veterinary officers through training programs (Model course or Short course), the institute asked about the difficulties experienced by their farming communities. Apart from this, the scientists

		directly survey and interact with livestock farmers through various projects such as Farmer First project, AICRP projects, Institute IRC projects etc. to identify and work on the problems faced by the farmers.									
(iii)	What is ICAR's vision for conducting customized research work that takes into account the local climatic and geophysical conditions of each state?	ICAR-NIANP Vision: Productivity enhancement for profitable and sustainable livestock production

<p>6. Lok Sabha Question No. 2481 (Replied on 05.08.2024)</p>											

Sl. No.	Question	Reply
1.	Whether ICAR has signed agreement with companies like Bayer, Amazon, Koromandal International, DhanukaAgritech in recent past?	No agreement with these companies but the institute has agreement with other industries in commercialization of technologies
2.	If so the details of the financial cost incurred by the Govt. alongside details of the Intellectual Property Right (IPR) in this regard	NA
3.	Whether ICAR has signed any MoU with any farmer organizations to advance its research agenda	MoU with BAIF Development Research Foundation, Pune
4.	If so, the details thereof and if not the reason there for?	We have MoU with BAIF Development Research Foundation, Pune for research collaboration under AICRP and Outreach Methane program for improving reproductive and productive performance in animals and also to develop nutritional modules to reduce the enteric methane emission for climate resilient livestock production system.

8. Rajya Sabha Diary No. U4393: 7 Agricultural Plans & Emerging challenges (Replied on 11.12.2024)

		Question	Reply
		(a) Whether it is true that the Cabinet has approved 7 agricultural plans within out lay of Rs. 14,000 crores	Yes
		(b) Details of emerging challenges that are going to be addressed through above plans	<ul style="list-style-type: none"> • To establish the climate change impact on livestock and developing amelioration strategies to sustain small ruminant production • To develop strategies to improve nutrient availability and utilization in livestock • Nutritional and physiological interventions for enhancing reproductive performance in animals • Estimation of methane emission under different feeding systems and development of mitigation strategies • To develop, update and standardize meat, fibre and skin technologies in small ruminants • Genetic evaluation and improvement of indigenous goat and sheep breeds through selective breeding at farm level (nucleus flock) and propagation of elite germplasm • To provide referral and consultancy services on sheep and goat production and product technologies. • Enhancing quality and safety of meat and meat products, and effective animal by-products utilization

			<ul style="list-style-type: none"> • Development of value-added meat products for promoting entrepreneurship and strengthening meat value chain • To develop and transfer improved technologies on goat and sheep production to stakeholders <p>The institutes under the sub-scheme are actively involved in cutting edge research in the fields of animal nutrition and physiology including male fertility assessment through gene chip-based diagnostic, production of quality embryos and stem cells for enhancing animal productivity and basic research models, semen extender for buffalo, development of desired sex embryos, national strategies/recommendations to reduce the enteric methane emission from livestock, safer alternative to the feed antibiotics, diagnostics and ameliorating technologies for thermal stress in livestock as well as identification of climate resilient livestock species. In view of increasing demand for small ruminant meat and milk there is a need for enhancement of infrastructure for hygienic slaughter, value-addition, processing and marketing will be required. The institutes also strive for enhancing the farmers' income by providing improved genotypes, training and skill development, validated area specific technologies and optimal packages of practice to the sheep and goat farmers. NRC on Meat is devoted for meat science research and has relevance of meat sector, which has increased in the country due to changes in livestock rearing purpose and functions necessitated by socio-economic changes, increasing urbanization, mechanization in agriculture,</p>
